POWER UNITS

Fluid Power Sales produces top quality power units for the **Mobile** and **Industrial** fields.

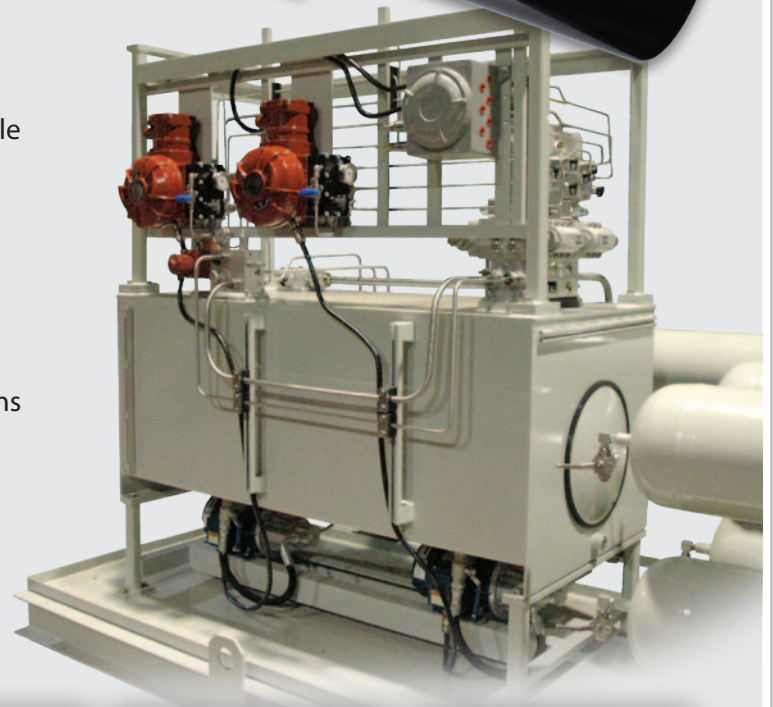

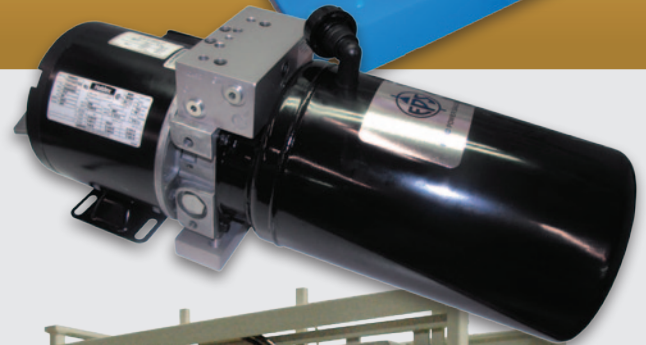

By selecting from the various products that we offer and utilizing our vast manifold capabilities, we are able to package the perfect power unit for your needs.

CAPABILITIES INCLUDE:

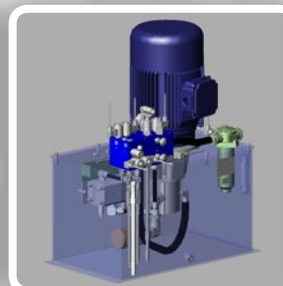

- Sizes ranging from small power packs to large industrial power unit skids
- FPS custom manifolds integral to power unit designs
- Custom electrical enclosures available

FEATURES:

- Custom and catalog designs
- Complete with control manifolds
- Durable construction
- Strict quality control
- Steady reliability
- Integrated circuit design
- Proven technical expertise
- High performance
- 3D modeling capabilities

Wide range of applications

Advanced engineering

Application specific testing

FLUID POWER SALES, INC.

Our engineering is what sets us apart

We offer our customers an unparalleled level of expertise and hydraulic knowledge. Giving you the best solution is what drives our business: top-of-the-line, completely custom, and durable parts that refuse to compromise in the most uncompromising conditions. We pride ourselves on going out of our way to give you exactly what you need with flexibility and engineering ingenuity.

Design and manufacturing

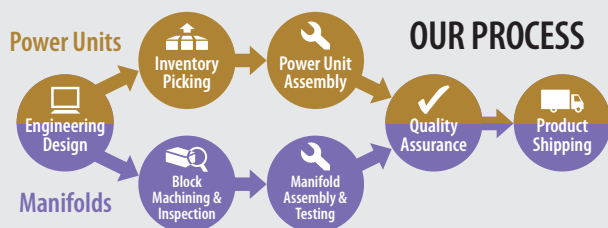

Our design engineers work closely with your production team to design a custom hydraulic system to meet your exacting standards and requirements. Careful consideration of your hydraulic objectives, combined with innovative design techniques, enable us to provide effective and cost-efficient packages.

Precision quality control

Critical tolerances, materials and production requirements are continually monitored at every stage during the manufacturing process, ensuring that desired quality standards are consistently exceeded. Our goal is to provide total-quality turn-key hydraulic systems with value and reliability engineered into your products.
